**Seedling Trays
& Pro Trays**

Seedling Tray / Pro Tray

Star Agro India , A leading manufacturer of quality seedling & Pro trays. widely uses for growing Tomato, Chili, Cucumber, Banana, Papaya, Sugarcane and all kind of seeds and more ...

Star Agro India's seedling trays one of uniform thickness , flexible easy to handle durable and long lasting. widely used across the INDIA by Farmers ,Tissue Culture Labs, Agriculture university , seeds companies R&D. laboratory and Nursery...

Why Use Seedling Trays ?

In an era when farmers have graduated to high-value hybrid vegetable seeds;

Seedling trays make it possible to account for each seedling, the reason that every seed is placed manually one by one.

This makes it easy to count actual germination and seedling survivals.

The seedlings have less pest and disease infestation because the trays are used with sanitized growing media.

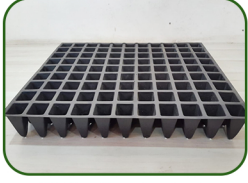

At transplanting, the growing media covers the root system which prevents transplanting shock in the field or greenhouse.

Transplanting shock slows down crop growth and delays maturity

STAR AGRO INDIA agronomists guide every farmer during procurement on the most appropriate tray to use.

Seedling Germination Products

99 Cavity Conical

50 Cavity Sugarcane

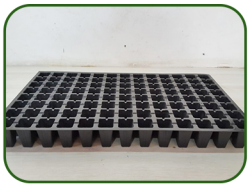

50 Cavity Round

104 Cavity Round

98 Cavity Round
